Experience

Product Designer

📅 June, 2021 - Current 📍 Lahore

E-Processing Systems Limited

E-Processing Systems is a leading fintech company housing two innovative products: Oneload and OneZapp.

OneZapp:

- Revamped the website and application (Android, Web) for OneZapp, achieving a noteworthy 16% reduction in churn rate.
- Introduced push notifications to enhance user experience and cut down SMS costs to zero.
- Conducted a comprehensive competitive analysis and conceptualized three distinct customer segments, including individuals, merchants, and agents.
- Designed debit card and stationary designs and integrated them into the product.
- Created marketing materials, including social media posts, posters, and banners, to promote the product and increase user engagement.
- Executed user research to discern user needs and pain points, skillfully integrating these insights into the design process.
- Collaborated with cross-functional teams, including Product Managers Engineers, and other Designers, to deliver a high-quality product.

Oneload:

- Designed and launched the website for Oneload, micro lending payments for Bank Alfalah and Kunda, transport partners integrations for Bykea, a sales team portal, and a wallet back-end reporting portal
- Crafted wireframes and visual designs for Payfast, EasyPaisa, and Finpro, ensuring a superior user experience through thoughtful and intuitive design elements.
- Conducted user research to identify pain points and improve user engagement.
- Created wireframes, prototypes, and high-fidelity designs for web and mobile applications.
- Developed and maintained design systems to ensure consistency across products.
- Collaborated with cross-functional teams to define user requirements and create design solutions.

UI UX Designer

📅 Sep, 2020 - May, 2021 📍 Lahore

Thirty North Dev

Thirty North Dev is a distinguished software house, where I actively contributed to various projects showcasing versatility and proficiency in software development.

- Conducted user research to identify pain points and improve user engagement.
- Created wireframes, prototypes, and high-fidelity designs for web and mobile applications.
- Established and sustained design systems to uphold uniformity and coherence across diverse products.
- Collaborated with cross-functional teams to define user requirements and create design solutions.
